Personal summary

Frontend-focused Full-Stack Engineer with 9+ years of experience building enterprise fintech and e-commerce applications.
Specialized in React and TypeScript, with hands-on Node.js backend experience in APIs and service integration.
Building AI-powered engineering tools and full-stack products, focusing on maintainable architecture and delivery efficiency.

Skills

Frontend:	HTML5, CSS3, JavaScript (ES6+), TypeScript, React, React Native, Redux
Backend:	Node.js, Express.js, NestJS, REST APIs, MongoDB
Tools:	Git, GitHub, Figma, Jira, Confluence

Projects

PawHaven — Open-Source Project

- Building an open-source animal rescue platform with full-stack architecture and end-to-end product development.
- Designing modular architecture and reusable components for maintainability and scalability.
- Developing an AI-powered engineering harness to automate development workflows, testing, and code review.

Experience

08/2022 – present

Full-stack Software Engineer

Manulife | client.asia.manulifeam.com | Chengdu, China
Global financial services company providing insurance and investment management solutions.
Tech Stack: TypeScript, React, Express.js, NestJS, MongoDB

- Led design token implementation across 5 microfrontend services, standardizing styling and reducing frontend styling issues by at least 30%.

- Refactored a legacy PDF report module with React, reducing new report development time by 40%.
- Independently designed and built the component library architecture, integrating AI-powered review and maintenance to ensure component quality.
- Collaborated on fund trading modules supporting 3,000+ fund managers and millions of investors.
- Built AI-powered tools to accelerate development, improve team onboarding, and help BAs understand historical business logic.

08/2021 – 07/2022

Senior Frontend Software Engineer

Newegg | newegg.com | Chengdu, China

North American e-commerce platform specializing in technology products and electronics.

Tech Stack: JavaScript, TypeScript, React, React Native, Redux

- Led an Angular-to-React micro-frontend migration with zero production downtime across three teams.
- Built A+ content marketplace features, improving seller publishing efficiency by 40%.
- Delivered 12+ mobile app features enabling end-to-end store management for sellers.

09/2017 – 06/2021

Frontend Software Engineer

Hucai | gw.hucai.com | Guangzhou, China

Software solutions provider specializing in e-commerce platforms and enterprise applications.

Tech Stack: JavaScript, Vue, React, Redux, Webpack

- Developed core e-commerce features, including cart and inventory management, for a platform serving 2,000+ daily users.
- Built a React-based attendance platform for 1,000+ employees, reducing HR manual workload by approximately 60%.

Education

09/2013 – 06/2017

Bachelor of Journalism

Lanzhou University of Finance and Economics

Gansu, China

Additional Skills & Interests

Languages

- English - Advanced (C1), Chinese - Mother Tongue, German - Beginner (A1)

Interests

- Outdoor hiking and trekking, with a passion for long-distance trails and spending time in nature.
